

MANAGED IT SOLUTIONS

Solving technology challenges with innovative solutions.

Grid4 provides businesses proven technology expertise across every phase of the IT lifecycle, including strategy, implementation and ongoing management and support.

WE MAKE IT WORK

ENHANCED CORE FOCUS

Outsourcing the daily management activities of your IT environment and infrastructure means you can focus on core competencies and business goals, **we handle it all.**

FLEXIBILITY

Scale your IT environment as you grow, and combine various technologies to support varying workload and performance requirements.

“Grid4 is a Trusted Michigan Technology Partner, Providing Reliable Service and Savings for their Customers.”

INCREASED UPTIME

Proactive, 24/7 monitoring detects and solves issues before they become a problem that slows you down.

OPERATE SMARTER

Make educated decisions about your technology. With Grid4’s Managed IT services you’ll always understand what’s happening in your environment and the expected business impact of opportunities we identify to increase performance.

WE HANDLE IT ALL

INCREASED SUPPORT

Grid4 Managed IT is your single source technology services provider. Our engineers offer Tier 1 Support and can escalate tickets on your behalf with third parties like Microsoft or Cisco, fully resolving any technical challenges that arise.

ENSURING NETWORK SECURITY

Rest assured your systems are safe from malicious attacks with proactive Grid4 multi-layered protections, Firewall management, and more in the event of an emergency. We’ll monitor and administrate your security to eliminate risks from outside threats.

SAFE & SECURE STORAGE

Outages whether power or Internet service can cripple a network, your data is backed up in the event of such an emergency. Grid4 offers options such as off-premise colocation, or cloud storage to meet your disaster recovery plan.
