

MPLS IP-VPN

Maximize productivity by connecting your corporate HQ, data centers, branch offices and mobile users to each other.

MPLS IP-VPN FEATURES

Class of Service (CoS)

- Supports Class of Service that's compatible with all access types.

Fully Meshed Network

- Allows regional sites to exchange data without consuming unnecessary bandwidth at the hub.

Existing Private Addressing

- Use existing private addressing without the need to perform network address translations or building complicated tunnels between sites.

Security Management

- Hosted firewall options provide you with the level of strategic control that you require.

YOUR SECURE PRIVATE CLOUD

Today's businesses are looking to leverage the capabilities of IP networks to interconnect offices simply and efficiently. Grid4's MPLS service allows companies to use existing private addressing without needing to perform Network Address Translation or building complicated tunnels between sites.

SERVICE FLEXIBILITY

Unified communications among all locations with MPLS provides any-to-any connectivity with a robust and powerful network architecture.

DESIGNED WITH SECURITY IN MIND

Each private network is kept from general Internet traffic which allows for centralized control of an organization's Internet access policies. A hosted firewall gains the protection of being in a secure, state-of-the-art data center with redundant power.

COST EFFECTIVE

Grid4 provides a cost-effective solution with simple billing components. Port and access are the only required components for a fully meshed MPLS IP-VPN network.

Smarter Communications That's Reliable and Provides Savings

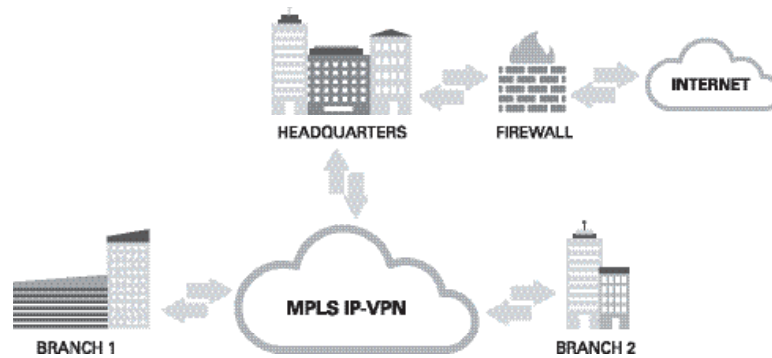

TRUSTED, RELIABLE AND SECURE

Unlike other providers, Grid4 is a telecommunications carrier and a Managed IT services provider, this ensures your organization receives competitive calling plans as well as industry leading technical services - all from one source.

- Grid4 is a Microsoft Certified Partner which provides customers with the expertise and comfort of knowing trusted, local support is immediately available.

AGILE, STREAMLINED DEPLOYMENT

The Grid4 implementation team provides the necessary tools and training to increase business productivity quickly. Our teams work with your schedule to ensure success.

MPLS provides secure, reliable, private communications between multiple locations, increasing flow of network traffic.

Grid4 Business Solutions

Cloud Phone System

A future-proof alternative to on-premise phone systems. Grid4 has been delivering cloud phone system solutions to businesses since 2007. Communicate smarter with more ease and flexibility, maximizing productivity and performance.

IP Voice (VoIP)

Grid4 has over 20 years of experience delivering the highest quality SIP and PRI VoIP solutions via a carrier grade softswitch and network.

MPLS IP-VPN

Connect your employees at multiple locations on a dedicated and reliable private network.

SD-WAN

Maximize your uptime by utilizing multiple Internet connections, while lowering operational costs and efficiently monitoring bandwidth usage for single or multi-site deployments.

Dedicated Internet Access

As a true carrier, Grid4's interconnected network leverages multiple tier-1 networks across the globe to deliver high-speed Internet access solutions.

Managed IT Solutions

Grid4 Managed IT Solutions optimize the efficiency, productivity, and agility of your IT environment, so you can focus on growing your organization.

Our highly knowledgeable team provides strategic guidance, best practices, lifecycle services, network monitoring, comprehensive support, and more to help maintain your infrastructure, reduce costs, and minimize risk.
