

VOIP & SIP TRUNKING

Keep your employees productive and your customers satisfied with a perfect mix of voice, high-speed Internet and advanced applications.

Session Initiation Protocol (SIP) manages all traffic between your IP enabled phone system, the Grid4 network and the Public Switched Telephone Network.

VOIP FEATURES

- Unlimited Local Calling
- Unlimited IntraLATA Toll Calling
- Microsoft Teams enabled SIP Trunks
- VoIP can be delivered over broadband
- Toll Free Numbers
- Voicemail & Unified Messaging
- Call Forwarding
- Accounting Codes
- Free Directory Assistance Calls

VOIP BENEFITS

SAVE MONEY

Enjoy the cost savings of converging your local, long distance and broadband Internet services onto a single circuit with dynamic bandwidth allocation.

SMARTER SIMPLICITY

Experience the efficiency of managing a single network connection, receiving one bill and engaging one point of contact for all your local, long distance and Internet services.

PROTECT YOUR INVESTMENT

Whether you use SIP, PRI or FXS today, preserve your existing capabilities through seamless integration with your current phone system.

SAVE TIME

Dedicated and knowledgeable technicians, installation teams and customer support specialists ensure rapid deployment.

SIP TRUNKING BENEFITS

REDUCE COSTS

Reduce the recurring costs of separate voice and data circuits.

BOOST CAPACITY

Gain additional network capacity without the expense of adding additional circuits.

ELIMINATE MEDIA GATEWAYS

Eliminate the cost of purchasing, supporting and maintaining a media gateway.

INCREASE BANDWIDTH

Maximize circuit capacity by eliminating protocol conversions.

GRID4 & MICROSOFT TEAMS INTEGRATION

Grid4 native Direct Routing integration enables your employees to make and receive calls through MS Teams, guaranteeing secure and reliable communications between Teams and the Grid4 network.

- Grid4 affordable Calling Plans, Microsoft certified support team, and native integrations ensure reliable system functionality.

TRUSTED, RELIABLE AND SECURE

Unlike other providers, Grid4 is a telecommunications carrier and a Managed IT services provider, this ensures your organization receives competitive calling plans as well as industry leading technical services - all from one source.

- Grid4 is a Microsoft Certified Partner which provides customers with the expertise and comfort of knowing trusted, local support is immediately available.

Grid4 Business Solutions

Cloud Phone System

A future-proof alternative to on-premise phone systems. Grid4 has been delivering cloud phone system solutions to businesses since 2007. Communicate smarter with more ease and flexibility, maximizing productivity and performance.

IP Voice (VoIP)

Grid4 has over 20 years of experience delivering the highest quality SIP and PRI VoIP solutions via a carrier grade softswitch and network.

MPLS IP-VPN

Connect your employees at multiple locations on a dedicated and reliable private network.

SD-WAN

Maximize your uptime by utilizing multiple Internet connections, while lowering operational costs and efficiently monitoring bandwidth usage for single or multi-site deployments.

Dedicated Internet Access

As a true carrier, Grid4's interconnected network leverages multiple tier-1 networks across the globe to deliver high-speed Internet access solutions.

Managed IT Solutions

Grid4 Managed IT Solutions optimize the efficiency, productivity, and agility of your IT environment, so you can focus on growing your organization.

Our highly knowledgeable team provides strategic guidance, best practices, lifecycle services, network monitoring, comprehensive support, and more to help maintain your infrastructure, reduce costs, and minimize risk.
